

From: Svetlana Aleksandrova, Coventry University, 23/1/19

Subject: 5th meeting of the Particular Matter Filtration SIG

We are pleased to announce that the fifth meeting of the Special Interest Group in Particular Matter Filtration in Automotive and Marine Applications will take place at the University of Birmingham on February 25th, 2019.

The meeting will cover a range of topics, including new and mature particle removal technologies. The provisional programme includes the following talks:

- Prof Roy Harrison (University of Birmingham) "Evaluation of the efficacy of motor vehicles emission controls through atmospheric measurements"
- Natasha Easton (University of Southampton) "Chemical Source Profiling of Port and Ship-Related PM Emissions"
- Dr Antonio Garcia (CMT, Valencia) "Particulate Characterization and Filtration of Reactivity Controlled Compression Ignition Combustion"
- Dr Jeremy Hawkes (University of Manchester) "Capturing particles in air or water with ultrasound standing waves"
- Matthieu Hascoet (Tallano Technologie) "At source brake dust collection solution"

You can register for the meeting [HERE](#). The meeting attendance is free and open to anyone, not just members of the group. There will be funding available for PhD student attendance as usual, and posters in all topics relevant to the group activities (and any adjacent areas) are welcome. If you know anyone who you think may be interested in the meeting, please forward the information as appropriate.

We are looking forward to seeing you in Birmingham
