

From: Tom De Vuyst, Brunel University, 6/6/19

Subject: 'Smoothed Particle Hydrodynamics and Industry' event

The next SPH SIG event, entitled 'SPH and Industry' will take place on the 10 July. The event will be hosted by Brunel University, and will take place at the Granta Centre in Great Abington, Cambridge.

The focus for this event is on industrial applications of the SPH method, and will provide:

1. An overview of the current state of the art of the SPH method
2. A spotlight on the wide range of industrial applications for SPH
3. An opportunity to discuss potential applications of SPH with experts from academia and industry

More detailed information, including the full programme, can be found on the event web page:
